## Preface

Senate Joint Resolution (SJR) 104 of the 1996 Session of the General Assembly directed the Joint Commission on Health Care in consultation with the Secretary of Health and Human Resources, to review and make recommendations concerning the Commonwealth's numerous governmental, not-for-profit, and independent entities receiving state funds or having responsibilities for or involvement in health care policy or regulation. As an initial step in its study, the Joint Commission was requested to identify the entities with health care or health care-related missions and to determine which functions and roles overlap or converge.

Based on our research and analysis, we concluded the following:

- There is a large number (63) of health care and health care-related boards, commissions, committees and councils; most, if not all, have specific constituencies which support their mission and existence.
- Major health care agencies believe the current number, structure, mission and functions of their respective boards, commissions, committees and councils are appropriate.
- The Department of Medical Assistance Services is working to re-structure its advisory committee on Medicare and Medicaid.
- There is little interaction between the various boards, commissions, committees and councils.
- The Virginia Health Planning Board has not met in several years; consideration should be given to re-structuring or eliminating it.

A number of policy options were offered for consideration by the Joint Commission regarding the issues addressed in this report. These policy options are discussed on page 9.

Our review process on this topic included an initial staff briefing which you will find in the body of this report followed by a public comment period during which time interested parties forwarded written comments to us on the

report. In many cases, the public comments, which are provided at the end of this report, provided additional insight into the various topics covered in this study.

## I. Authority for Study

Senate Joint Resolution (SJR) 104 of the 1996 Session of the General Assembly directed the Joint Commission on Health Care, in consultation with the Secretary of Health and Human Resources, to review and make recommendations concerning the Commonwealth's numerous governmental, not-for-profit, and independent entities receiving state funds or having responsibilities for or involvement in health care policy or regulation. As an initial step in its study, the Joint Commission was requested to identify the entities with health care or health care-related missions and to determine which functions and roles overlap or converge. The resolution also directs the Joint Commission to recommend an appropriate revision of these entities which may include combining, separating, eliminating or restructuring the many health-related duties spread throughout the Commonwealth.

A copy of SJR 104 is provided at Appendix A.

## II. Background

### **This Initial Phase Of The SJR 104 Study Focuses On The Boards, Commissions, Committees And Councils In The Commonwealth With Health Care Or Health Care-Related Functions Or Responsibilities**

Senate Joint Resolution 104 requests a review of all entities having responsibilities for or involvement in health care or health care-related policy or regulation, including state agencies and not-for-profit entities. However, prior to recommending any revision(s) of the current structure, it is essential to first develop a complete "inventory" of the various bodies that exist and an understanding of the relationships between and among these entities. After consultation with the patron of the resolution, it was determined that this initial phase of the study should focus only on the various boards, commissions, committees and councils that have been established to facilitate appropriate health care or health care-related policy or regulation. Accordingly, the primary focus of this initial report is to develop a "spreadsheet" or inventory of the

various entities, other than state agencies, involved in health care or health care-related policy or regulation.

### **Section 9-6.25 Of The Code Of Virginia Classifies And Defines The Various Executive Branch Boards, Commissions And Councils**

Section 9-6.25 of the Code states that every collegial body established by law or executive order within the executive branch of state government shall be classified according to its level of authority as follows:

"Advisory" - A board, commission or council is classified as advisory when its purpose is to provide advice and comment to an executive branch agency or official. An advisory board, commission or council does not serve a regulatory or rule-making purpose.

"Policy" - A board, commission or council is classified as policy if it is specifically charged by statute to promulgate public policies or regulations. It may also be charged with adjudicating violations of those policies or regulations. Policy boards, commissions or councils are not responsible for supervising agencies or employing personnel. They may review and comment on agency budget requests.

"Supervisory" - A board is classified as supervisory if it is responsible for agency operations including approval of requests for appropriations. A supervisory board appoints the agency director and ensures that the agency director complies with all board and statutory directives. The agency director is subordinate to the board.

Section 9-6.25(B) provides that each executive branch board, commission or council can be assigned to only one of the above classifications, and that the classification for such entities created by law shall be designated in the enabling legislation.

### **III.**

## **Boards, Commissions, Committees, And Councils With Health Care Or Health Care-Related Missions**

**There Are Approximately 63 Health Care Or Health Care-Related Boards, Commissions, Committees And Councils Established By Law**

Based on a review of the Code of Virginia, the 1995-96 Report of the Secretary of the Commonwealth and information provided by various state agencies, there are approximately 63 boards, commissions, committees and councils established in the Code of Virginia with responsibilities for health care or health care-related policy or regulation. This number includes 61 executive branch entities and 2 legislative branch entities.

Included in the 63 entities established by law are: 24 which are identified in §9-6.25:1 as "advisory" boards, commissions or councils; 23 identified in §9-6.25:2 as "policy" boards, commissions or councils; and 1 identified in §9-6.25:3 as a "supervisory" board, commission or council. The remaining 15 entities identified in Appendix B, while not listed in any of these three Code sections, are, nonetheless, involved in health care issues.

Due to the large number of entities, information regarding these 63 entities is too voluminous too be included in the body of this report. A matrix is provided in Appendix B which provides the following data on each: **Name of Entity, Code Authority, Mission/Purpose, Number of Members, Member Composition, Appointing Authority, and Meetings**. The information provided in Appendix B represents the major research and analysis contained in this issue brief, and serves as the basis for the overall findings and conclusions provided in the next section of the report.

The number of health related entities is described as an approximation because the nature of some entities is such that it is difficult to determine their "primary" focus or purpose. It is possible that other entities should be included in the list of 63; similarly, it is possible that some included in the list should have been left out. Nonetheless, the information provided in Appendix B provides a

comprehensive overview of the number and types of entities involved in health care and health care-related policy and regulation.

### **Additional Health Care And Health Care-Related Committees And Councils Are Formed By Agencies**

In addition to those entities established in the Code, many state agencies form their own advisory committees and councils to provide input and advice to the agency on various health care and health care-related issues. For example, while not required by the Code of Virginia, the Department of Health has established several advisory committees, including the Biosolids Regulations Advisory Board, the Mary Marshall Nursing Scholarship Committee, the Minority Health Advisory Committee and the Student Health Information System Task Force.

Often, these entities are established by agencies as ad hoc or informal bodies for limited purposes and often for a limited period of time. While the number of these advisory bodies is not known, there likely are many in existence. These entities are not included in the information provided in Appendix B.

### **Special Study Committees And Sub-Committees Are Formed To Review Specific Health Care Issues**

Each year, the legislature establishes a number of special committees or sub-committees to study various issues, including health care matters. These bodies typically are established for a limited period of time, and study or review specific topics. Due to the changing number and nature of these entities, they, too, are not included in the information provided in Appendix B.

### **Private, Not-For-Profit Entities Also Are Involved In Certain State Health Care Issues**

While not included in the information provided at Appendix B, there are private, not-for-profit entities also involved in certain state health care issues. For instance, the Virginia Health Care Foundation (VHCF) was established in 1992 to encourage public/private partnerships that provide access to primary

health care services for underserved Virginians. The Commonwealth has appropriated funds since the inception of the VHCF to support its activities. A total of \$2.4 million in general funds were appropriated for each year of the 1996-98 biennium. Another example of a private entity involved in health care issues is Virginia Health Information (VHI) which is under contract to the Department of Health to administer various health care cost and quality data initiatives such as the patient level data base. The Commonwealth supports the activities of VHI through general fund appropriations to the Department of Health.

## IV. **General Findings and Conclusions**

As noted earlier, the primary purpose of this report is to identify the many boards, commissions, committees and councils with responsibility for health care or health care-related policy and regulation. While no detailed analysis of the entities identified in Appendix B is presented in this issue brief, the collection and organization of this data generated some general findings and conclusions.

### **There Is A Large Number Of Health Care And Health Care-Related Boards, Commissions, Committees And Councils; Most, If Not All, Have Specific Constituencies Which Support Their Mission And Existence**

As seen in Appendix B, there is a large number of health care and health care-related boards, commissions, committees, and councils. Nearly all of them are focused on specific health issues as opposed to broad health policy. Most, if not all, of these entities have specific constituencies which rely on these bodies for input and participation in policy discussions and decisions which impact their interests. Any revision, consolidation, re-structuring or elimination of these entities likely would cause concerns among the various interest groups. Accordingly, prior to recommending any such actions, the affected constituencies would need to be consulted.

### **Major Health Care Agencies Believe The Current Number, Structure, Mission And Functions Of Their Respective Boards, Commissions, Committees And Councils Are Appropriate**

The agency heads of the major executive branch health care agencies with several boards, councils, etc. (i.e., the Departments of Health, Medical Assistance Services, and Health Professions) indicate that they believe the current number, structure, function and mission of their respective boards, committees, and councils are appropriate. They further indicated that there is little overlap or duplication among their respective policy and advisory entities.

## **The Department Of Medical Assistance Services Is Working To Re-Structure Its Advisory Committee On Medicare And Medicaid**

As noted on page 13 of Appendix B, the Advisory Committee on Medicare and Medicaid has not met since June of 1991, and all appointments have expired. The Department of Medical Assistance Services (DMAS) currently is working to re-structure this committee. Initially, DMAS wanted to abolish the committee and have the Board of Medical Assistance Services fulfill the federal requirement to have a committee focusing on these issues. However, §9-6.25(B) of the Code stipulates that executive branch boards, commissions and councils can have only one classification. Since the Board of Medical Assistance Services is a "policy" board, it cannot also be classified as an "advisory" board. Thus, DMAS now is considering reducing the number of members from 21 to 11 to make the committee more effective. The Department hopes to complete the re-structuring of this committee in the near future.

## **There Is Little Interaction Between The Various Boards, Commissions, Committees And Councils**

To date, there has been little interaction between the various health care and health care-related boards, commissions, committees and councils. However, recently, the Board of Health has expressed an interest in having joint meetings with the Board of Medical Assistance Services to discuss issues of mutual interest. While there is little interaction among these entities, there is interaction between the staff of the various agencies with which these entities are associated.

## **The Virginia Health Planning Board Has Not Met In Several Years; Consideration Should Be Given To Re-Structuring Or Eliminating It**

The Virginia Health Planning Board, which was established in the Secretariat of Health and Human Resources to supervise and provide leadership for the state health planning system, has not met in several years. The duties and responsibilities of the board include:

- \* providing technical expertise in the development of health policy;
- \* reviewing and assessing critical health care issues;

- \* making recommendations to the Governor and the General Assembly concerning health policy, legislation, and resource allocation;
- \* supervising development of a health data system; and
- \* promoting the development and maintenance of a coordinated and integrated health planning system on the state and local levels.

The board is composed of 18 members, including consumers, providers and the agency heads of the Department of Health; Department of Medical Assistance Services; Department of Mental Health, Mental Retardation and Substance Abuse Services; Department for the Aging; and Department of Social Services.

Given the inactivity of this planning board, consideration should be given to re-structuring or eliminating it.

With the inactivity of the Virginia Planning Board and the focus of the other active bodies being limited to specific health care issues, there is no such entity (i.e. board, commission, committee of council) within the executive branch of government that has clear statutory responsibility for coordinating overall health care policy on a statewide basis. The Board of Health has the broadest authority; however, it traditionally has provided policy and regulatory direction primarily on public health issues rather than the whole spectrum of health care.

## V. Policy Options

The following policy options are offered for consideration by the Joint Commission.

**Option I: Take no action**

**Option II: Introduce A Study Resolution Directing The Secretary Of Health And Human Resources To Review The Inventory Of Boards, Commissions, And Councils Presented In This Issue Brief, And Recommend To The Governor, The Joint Commission On Health Care And The General Assembly Any Appropriate Revisions, Consolidations Or Re-Structuring Of These Entities. The Study Also Could Include A Review Of The Various Agencies Within The Health And Human Resources Secretariat.**

**Option III: Introduce A Resolution Directing The Secretary Of Health And Human Resources To: (i) Re-Convene The Virginia Health Planning Board; (ii) Assess The Continued Need For The Board; And (iii) Report To The Governor, The Joint Commission On Health Care And The General Assembly Whether The Board Should Be Continued Or Eliminated.**

This option is similar to Option II, except that the Secretary's review would be limited to the Virginia Health Planning Board.

**Option IV: Introduce Legislation To Eliminate The Virginia Health Planning Board**

**Option V: Endorse And Support The Department Of Medical Assistance Services' Efforts To Re-Structure The Advisory Committee On Medicare And Medicaid**

**APPENDIX A**

## SENATE JOINT RESOLUTION NO. 104

2 Requesting the Joint Commission on Health Care, in consultation with the Secretary of Health and  
3 Human Resources, to review and make recommendations concerning the Commonwealth's  
4 numerous governmental, not-for-profit, and independent entities receiving state funds or having  
5 responsibilities for or involvement in health care policy or regulation.

6 Agreed to by the Senate, February 29, 1996

7 Agreed to by the House of Delegates, February 27, 1996

8 WHEREAS, perhaps the first governmental entity to develop health care policy in Virginia was  
9 the Board of Health, as the regulatory body concerned with prevention and treatment of infectious or  
10 communicable diseases; and

11 WHEREAS, with the advent of the modern health care system, its many complex treatment  
12 modalities and settings, and interactions between business and the altruistic activity of caring for those  
13 who are ill or poor or incompetent, the elaborate heterogeneous structure of health care in the United  
14 States took on many forms and many separate lines of communication; and

15 WHEREAS, the Joint Health Care Commission is granted broad statutory authority for examining  
16 and evaluating health policy and structure issues in the Commonwealth; and

17 WHEREAS, in the exercise of this broad authority, the Commission has addressed many issues  
18 related to data collection, regulation, and competitive initiatives; and

19 WHEREAS, the Commission is, thereby, the most appropriate entity to examine the tangle of  
20 health policy, health regulatory, health services, and health data collection agencies that have grown  
21 to confusing proportions in recent years; and

22 WHEREAS, the Commonwealth has been very well served by many of these agencies and all of  
23 the people who perform such committed and thoughtful work for the health of our care systems and  
24 our people; and

25 WHEREAS, we have, unfortunately, reached the point at which efficiency may have begun to  
26 converge with mystification concerning which agencies have responsibility for what services, data, or  
27 regulation; and

28 WHEREAS, the time has come to examine the structure of Virginia's health-related agencies and  
29 to make assessments of the provided services in order to reorganize and simplify the chain of  
30 command and communications links; now, therefore, be it

31 RESOLVED by the Senate, the House of Delegates concurring, That the Joint Commission on  
32 Health Care, in consultation with the Secretary of Health and Human Resources, be requested to  
33 review and make recommendations concerning the Commonwealth's numerous governmental,  
34 not-for-profit, and independent entities receiving state funds or having responsibilities for or  
35 involvement in health care policy or regulation. As an initial step in its study, the Commission is  
36 requested to identify the entities with health care or health care-related missions and to determine  
37 which functions and roles overlap or converge. The Commission shall examine and evaluate all such  
38 agencies having responsibilities for health policy, health regulation, health services, and health data  
39 collection and shall inventory these responsibilities and analyze the overlap and the gaps in services.  
40 The Commission, in consultation with the Secretary of Health and Human Resources, shall make  
41 recommendations, by November 1, 1996, concerning an appropriate revision of these state entities,  
42 which may include combining, separating, eliminating, or restructuring and financing of the many  
43 health-related duties spread throughout the Commonwealth.

44 The Commission shall provide staff support for the study. All agencies of the Commonwealth  
45 shall provide available data to the Commission, upon request.

46 The Commission shall submit its findings and recommendations to the Governor and the Chairmen  
47 of the House Committees on Appropriations and Finance and the Senate Committee on Finance by  
48 November 1, 1996, and shall complete its work in time to submit its findings and recommendations  
49 to the Governor and the 1997 Session of the General Assembly as provided in the procedures of the  
50 Division of Legislative Automated Systems for the processing of legislative documents.

**APPENDIX C**

## Joint Commission on Health Care

### **Summary of Public Comments on Draft Issue Brief 5: Study of Various Entities Receiving State Funds or Having Responsibilities for Health Care Policy and Regulations**

Comments regarding the Study of the Various Entities Receiving State Funds or Having Responsibilities for Health Care Policy and Regulations Issue Brief were received from the following 9 interested parties:

Department of Health Professions  
Medical Society of Virginia  
Frank Medico  
Secretary of Health and Human Resources-Robert C. Metcalf  
Virginia Association of Nonprofit Homes for the Aging  
Virginia Association of Regional Health Planning Agencies  
Virginia Health Care Association  
Virginia Hospital & Healthcare Association  
Virginia Physical Therapy Association, Inc.

### **Policy Options Presented in Issue Brief**

The following policy options are offered for consideration by the Joint Commission.

**Option I: Take no action**

**Option II: Introduce A Study Resolution Directing The Secretary Of Health And Human Resources To Review The Inventory Of Boards, Commissions, And Councils Presented In This Issue Brief, And Recommend To The Governor, The Joint Commission On Health Care And The General Assembly Any Appropriate Revisions, Consolidations Or Re-Structuring Of These Entities. The Study Also Could Include A Review Of The Various Agencies Within The Health And Human Resources Secretariat.**

**Option III: Introduce A Resolution Directing The Secretary Of Health And Human Resources To: (i) Re-Convene The Virginia Health Planning Board; (ii) Assess The Continued Need For The Board; And (iii) Report To The Governor, The Joint Commission On Health Care And The General Assembly Whether The Board Should Be Continued Or Eliminated.**

This option is similar to Option II, except that the Secretary's review would be limited to the Virginia Health Planning Board.

**Option IV: Introduce Legislation To Eliminate The Virginia Health Planning Board**

**Option V: Endorse And Support The Department Of Medical Assistance Services' Efforts To Re-Structure The Advisory Committee On Medicare And Medicaid**

## **Summary of Individual Public Comments**

In summary, all five of the commenters who expressed support for any of the Options, supported Option II (further study of Secretary of Health and Human Resources to identify revisions, consolidations or restructuring). Three commenters provided additional information regarding the various boards, commissions and councils.

### **Department of Health Professions**

John W. Hasty, Director, provided additional information on the meetings held by various health professional boards. He commented that the Psychiatric Advisory Board has been inactive for 4 or more years and that the contribution of this board has been replaced with expert witnesses. He also indicated that it is unlikely that there would be opposition to eliminating this board.

### **Medical Society of Virginia**

Madeline I. Wade commented in support of Option II. Ms. Wade stated that she believed the study should be completed before proceeding with Options III, IV and V.

### **Frank Medico**

Frank Medico commented that (i) any further study should be conducted by the Joint Commission or other independent group; (ii) any further study should help establish an overall health care policy; (iii) health policy should be established before the organizational structure; (iv) the larger issue is not the number of entities but a void in health policy and fragmentation of responsibilities; and (v) organizational structure drives health care rather than the needs of citizens.

### **Secretary of Health and Human Resources**

Robert C. Metcalf commented in favor of Option II and suggested working with the Joint Commission on the study. He commented that he oversees key health policy issues primarily through various agency boards and that activating the Virginia Health Planning Board may be duplicative of existing boards. He also indicated that he would appreciate support of the Joint Commission regarding actions the Department of Medical Assistance Services may take concerning the Advisory Board on Medicare and Medicaid.

### **Virginia Association of Nonprofit Homes for the Aging**

Marcia A. Melton, Director of Public Policy, expressed support for Option II.

### **Virginia Association of Regional Health Planning Agencies**

Dean Montgomery commented that the Regional Health Planning Agencies have been active in health planning and certificate of public need reviews. He also indicated that there is a compelling need for a mechanism to foster statewide health planning and policy development.

### **Virginia Health Care Association**

Mary Lynne Bailey, Vice President for Legal and Government Affairs, commented in support of Option II. She stated that she believes there is duplication of regulatory authority and reporting requirements for long-term care facilities that could be addressed through this study.

### **Virginia Hospital & Healthcare Association**

Katharine M. Webb, Senior Vice President, expressed support for Option II and further stated that the study should include a review of agencies under the Health and Human Resources Secretariat.

### **Virginia Physical Therapy Association, Inc.**

Damien Howell, Legislative Chair, commented that the Physical Therapy Advisory Board should be added to the inventory of boards, commissions and councils provided in the issue brief.
